Hiring Manager
Sunway Medical Centre Penang

Subject: Application for Application Specialist Position

Dear Hiring Manager,

I am writing to express my interest in the **Application Specialist** position. With over 5 years of experience in software development, system analysis, and application support, I specialize in managing complex enterprise systems and supporting end-users to ensure smooth daily operations.

In my current position as Assistant Project Manager cum Software Engineer, I act as the primary contact for multi-module software systems, handling everything from user support to vendor coordination. Here is how my experience fits your requirements:

i. **Level 1 Application Support**: Experienced in troubleshooting system incidents, maintaining uptime, and managing issue tickets (including building an in-house Ticketing Support System).
ii. **Workflow Mapping & Requirements**: Skilled in gathering user requirements, translating workflows into clear system specifications (FSD), and managing Change Requests (CRs).
iii. **UAT & End-User Training**: Proven track record in executing User Acceptance Testing (UAT), setting up system configurations, and conducting training workshops.
iv. **Vendor & Team Liaison**: Experienced in coordinating between internal developers, external vendors, and management to deliver technical support promptly in high-pressure environments.

I am eager to bring my problem-solving skills, strong communication, and user support mindset to your Hospital Information System (HIS) and EMR operations.

Thank you for your time and consideration. I look forward to the opportunity to discuss how I can contribute to your team.

Sincerely,
Nabihah Taquddin Azmy
