Hiring Manager
Crowne Plaza Penang Straits City
Butterworth, Penang

Subject: Application for IT Manager

Dear Hiring Manager,

I am excited to apply for the **IT Manager** position at Crowne Plaza Penang Straits City. With over 5 years of experience in software engineering, IT systems management, and project coordination, I bring a strong combination of technical expertise and operational leadership that aligns closely with this role.

In my current position as Assistant Project Manager / Software Engineer at Ingenious Technology Solutions, I manage multi-module systems, monitor performance, troubleshoot technical issues, and coordinate with teams and clients to ensure smooth operations. I also have hands-on experience with web applications, databases (MySQL), APIs, and cloud storage solutions (AWS S3), which equips me to understand and maintain complex IT infrastructure effectively.

Previously, I worked as a Software Engineer at Airei Sdn Bhd, developing and maintaining web applications while providing user support and resolving system issues. My experience preparing documentation, reports, and training staff, combined with my ability to coordinate with vendors, positions me well to oversee hotel IT systems, ensure security and reliability, and support staff in using technology efficiently. I am also eager to quickly learn and adapt to PMS, POS, and other hotel-specific systems to ensure seamless operations.

I am enthusiastic about contributing my skills to Crowne Plaza, ensuring smooth IT operations that enhance both staff efficiency and guest experience. I would welcome the opportunity to discuss how I can support your hotel’s technology initiatives.

Sincerely,
Nabihah Taquddin Azmy
