Hiring Manager
NTT DATA
Perai, Penang

Subject: Application for On-site Desktop Support Engineer

Dear Hiring Manager,

I am writing to apply for the On-site Desktop Support Engineer position at NTT DATA. With over 5 years of experience in IT system support, software development, and project coordination, I bring strong technical expertise and proven problem-solving skills that align closely with this role.

In my current position as Assistant Project Manager / Software Engineer, I provide hands-on support for desktop and server systems, troubleshoot hardware and software issues, manage user accounts, and coordinate with internal teams to ensure smooth operations. I also have experience with Windows operating systems, enterprise applications, networking fundamentals (LAN, VPN, TCP/IP), and issue tracking, which equips me to resolve client IT support requests efficiently.

Alongside technical tasks, I have coordinated teams, prepared documentation, and delivered user guidance and training, strengthening my ability to lead, communicate, and support end users effectively. I am confident that my combination of technical proficiency, client-handling skills, and operational coordination will allow me to contribute positively to NTT DATA's IT support services.

I look forward to the opportunity to discuss how I can support your desktop support operations and contribute to maintaining reliable and secure IT services.

Sincerely,
Nabihah Taquddin Azmy
