Hiring Manager / **Recruitment Team** Dell Global Business Center Sdn Bhd

Subject: Application for Engineer 1, Software System Engineering Position

---

Dear Hiring Manager,

I am writing to express my strong interest in the **Engineer 1, Software System Engineering** position at Dell Technologies in Bukit Mertajam. With a Bachelor's Degree in Software Engineering from Universiti Putra Malaysia (UPM) and over 5 years of professional experience driving full-stack application development, software testing, and system analysis, I am eager to contribute to Dell's software systems team.

My technical background and experience align directly with the responsibilities outlined for this role:

- **Full SDLC & Feature Delivery:** Across my engineering roles, I have contributed to every phase of software development, from initial planning and functional specification documentation (FSD) to coding, testing, and production maintenance. I independently built and deployed an in-house ticketing support platform using Node.js, Express, and automated workflows.
- **Testing & Release Reliability:** I prioritize code quality by authoring comprehensive test cases, leading User Acceptance Testing (UAT) cycles, and validating bug fixes in staging environments to support seamless, reliable releases.
- **Data Engineering & AI/Context Concepts:** Beyond core languages (C/C++, JavaScript, Python, MySQL), I have hands-on experience structuring data workflows and deploying embedded machine learning models using **Edge Impulse (TinyML / Edge AI)**, matching Dell's focus on data pipelines and AI-assisted application tools.
- **Stakeholder Collaboration & Technical Documentation:** I excel at gathering user requirements, translating complex business needs into clear specifications, and keeping detailed developer documentation up to standard.

Having built my career bridging technical development with reliable software delivery right here in Penang, I am excited about the opportunity to join Dell and contribute to your next generation of system software solutions.

Thank you for your time and consideration. I look forward to discussing how my experience and skills can add value to your team.

Sincerely,
Nabihah Taquddin Azmy
