Hiring Manager / IT Leadership Team Dexcom Malaysia

Subject: Application for Staff Desktop Support Engineer Position

---

Dear Hiring Manager,

I am writing to express my strong interest in the **Staff Desktop Support Engineer** position at Dexcom Malaysia. With a Bachelor's Degree in Software Engineering from Universiti Putra Malaysia (UPM) and over 5 years of professional experience in IT system support, incident management, workflow automation, and infrastructure health monitoring, I am excited about the opportunity to support Dexcom's global IT operations and mission-critical manufacturing environment.

Dexcom's focus on endpoint modernization, reliable IT services, and scalable automation aligns closely with my technical support and system administration background:

- **Escalation & Advanced Support:** Across my roles as Assistant Project Manager and Software Engineer, I have served as the highest escalation point for technical issues, performing root-cause analysis, resolving complex OS/system defects, and maintaining strict SLA adherence.
- **Automation & Tooling:** I have built and deployed automated IT support workflows, including an in-house Ticketing Support System featuring role-based access control, SMTP notifications, and standardized incident resolution paths. My programming background (Python, JavaScript, C/C++) enables me to rapidly learn and apply PowerShell automation for endpoint scripting.
- **System Operations & Infrastructure Maintenance:** Experienced in enterprise system health monitoring, user access control, database capacity maintenance (managing 1TB expansion projects), and keeping standardized technical documentation for operational compliance.
- **Cross-Functional Communication & Leadership:** Proven track record acting as the technical Person-in-Charge (PIC), working alongside cross-functional engineering, infrastructure, and management teams to ensure operational uptime and seamless rollouts.

Having managed end-to-end IT support operations and software systems right here in Penang, I bring a strong analytical approach, dedication to IT service excellence, and an eager drive to uphold Dexcom's high security and compliance standards.

Thank you for your time and consideration. I look forward to discussing how my technical background and problem-solving skills align with Dexcom's IT endpoint strategy.

Sincerely,
Nabihah Taquddin Azmy
