Hiring Manager
EKO Metal Industries Sdn Bhd

Subject: Application for MIS Officer Position

Dear Hiring Manager,

I am writing to express my strong interest in the **MIS Officer** position at EKO Metal Industries Sdn Bhd in Bukit Mertajam. Holding a Bachelor's Degree in Software Engineering from Universiti Putra Malaysia (UPM) and over 5 years of professional experience in IT system support, database maintenance, system analysis, and process workflow optimization, I am eager to contribute to EKO Metal's manufacturing operations and technology infrastructure.

My background aligns directly with the core duties of a Management Information Systems (MIS) Officer:

- **System Administration & L1/L2 Support:** Hands-on experience delivering Level 1 and Level 2 application support, monitoring system health, and ensuring high operational uptime. Independently designed and deployed an automated Ticketing Support System featuring user role access control and incident resolution workflows to enforce SLA adherence.
- **Database & Data Performance:** Managed database expansion and capacity planning—including leading a 1TB MySQL expansion project—to preserve data integrity and prevent service disruptions across enterprise platforms.
- **System Analysis & Workflow Mapping:** Skilled in gathering user requirements from operational teams, authoring detailed Functional Specification Documentation (FSD), evaluating Change Requests (CRs), and mapping business processes to streamline workflows.
- **Cross-Functional Coordination:** Proven track record acting as a technical Person-in-Charge (PIC), bridging communication between internal end-users, management, technical developers, and external vendors.

I offer full local availability for on-site duties in Bukit Mertajam and a reliable, detail-oriented approach to maintaining EKO Metal's internal systems, operational reports, and IT workflows.

Thank you for your time and consideration.

Sincerely,
Nabihah Taquddin Azmy
