13700 Perai, Penang, Malaysia

nabihahtaqudin@gmail.com | +60135198421 | https://www.linkedin.com/in/nabihah-taquddin-azmy/

Professional Summary

Driven IT professional with over **5 years of experience** bridging business and technical teams. Experienced as the **single point of contact (PIC)** for multi-module systems, coordinating among clients, vendors, and developers while ensuring smooth, reliable project delivery. Skilled in **requirements analysis, functional documentation,** UAT **coordination, incident management, and process improvement**, with a strong technical foundation in **backend** technologies **(Node.js, Express.js, NestJS, CodeIgniter), frontend** technologies **(Bootstrap, React), and cloud storage (AWS S3)**.

Core Skills

- Business & System Analysis
- Requirement Gathering & Functional Specification
- UAT & Testing Coordination
- Project & Vendor Coordination
- SDLC / System Documentation

Tools and Platforms

- Project Management & Tracking: JIRA, Microsoft Project
- Documentation & Reporting: MS Office (Word, Excel, PowerPoint)
- Development & Testing: VS Code, Postman, Git, Node.js, Express.js, NestJS, CodeIgniter, React, Bootstrap
- Database & Cloud: MySQL, AWS S3

Professional Experience

Assistant Project Manager cum Software Engineer, Ingenious Technology Solutions Sdn Bhd
Dec 2022 – Present | Perai, Penang

- Produced **requirement specifications** and functional documentation for a 14-module system
- Translated **client business needs into system design**, incorporating change requests and scope adjustments
- Coordinated **cross-functional teams** (developers, testers, vendors) to ensure smooth project delivery
- Managed **UAT, test cases, and incident tracking**, improving project efficiency and minimizing errors

- Provided input for **system architecture enhancements**, including backend (Node.js, Express.js, NestJS, CodeIgniter) and frontend (Bootstrap, React) improvements
- Maintained project documentation, reports, and S-curves to ensure transparency and alignment with stakeholders

---

Software Engineer, Airei Sdn Bhd
Apr 2020 – Nov 2022 | Cyberjaya, Selangor

- Developed, tested, and maintained software applications aligned with business requirements
- Participated in **SDLC processes**: requirement gathering, coding, testing, and deployment
- Supported existing systems, conducted client support, and documented functional changes

---
